Optimization

Access Review
Assistant

Declarative Agents

Anatomy of
Declarative agent

Customized versions
of Microsoft 365
Copilot

Build with

- Agents Toolkit
- Copilot Studio Full
- Copilot Studio Lite
- SharePoint

Transformation of AI Agents

Interactive agent

Single, specific, repetitive, defined task

Autonomous agent

Complex, goal oriented, creates plans to achieve outcome

Digital employee

Learning driven, emulate human decision making

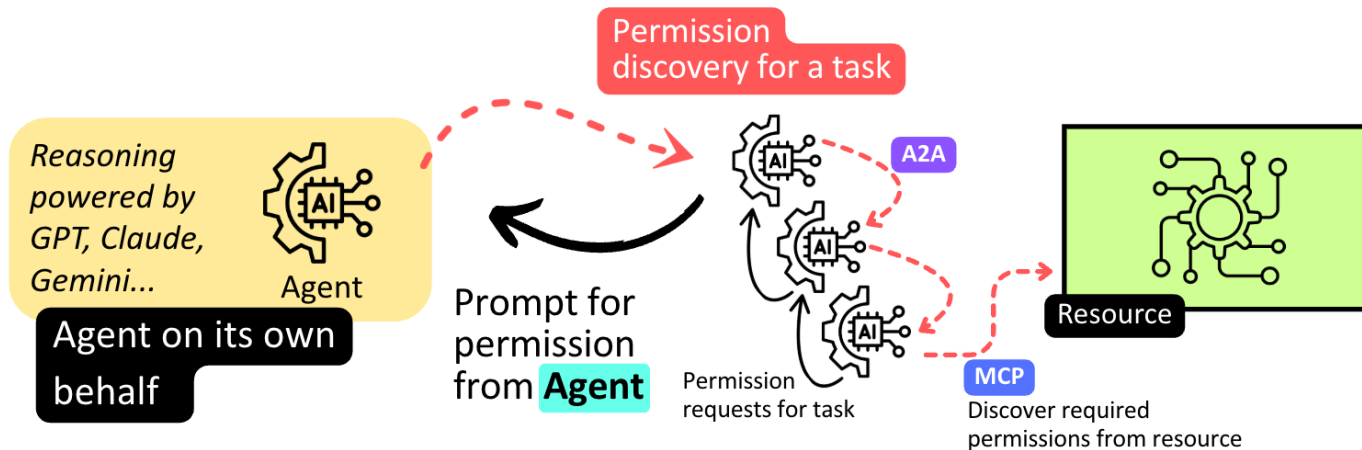

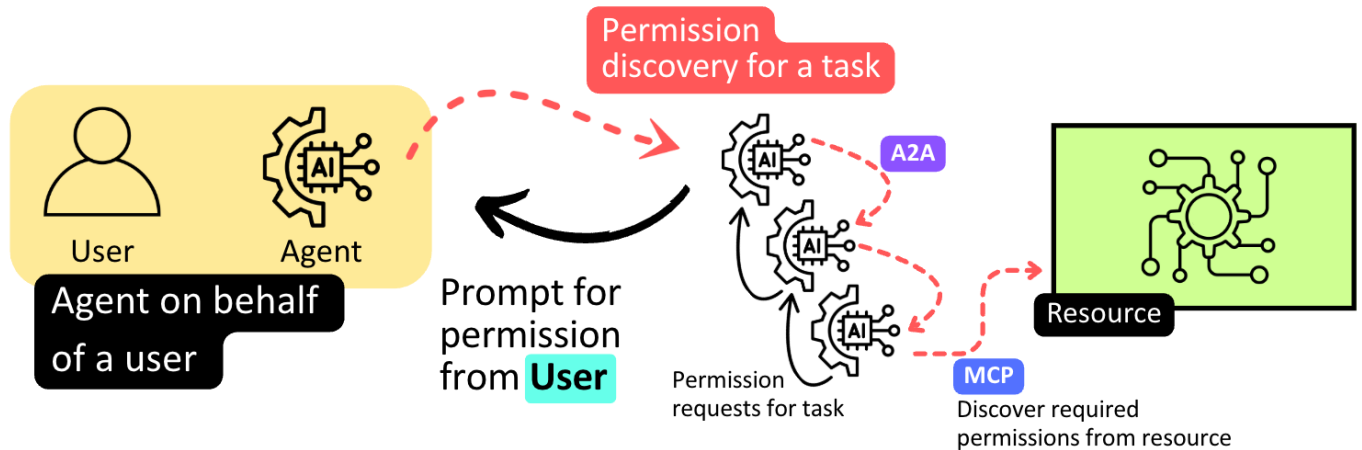

Agents should have their own Identity

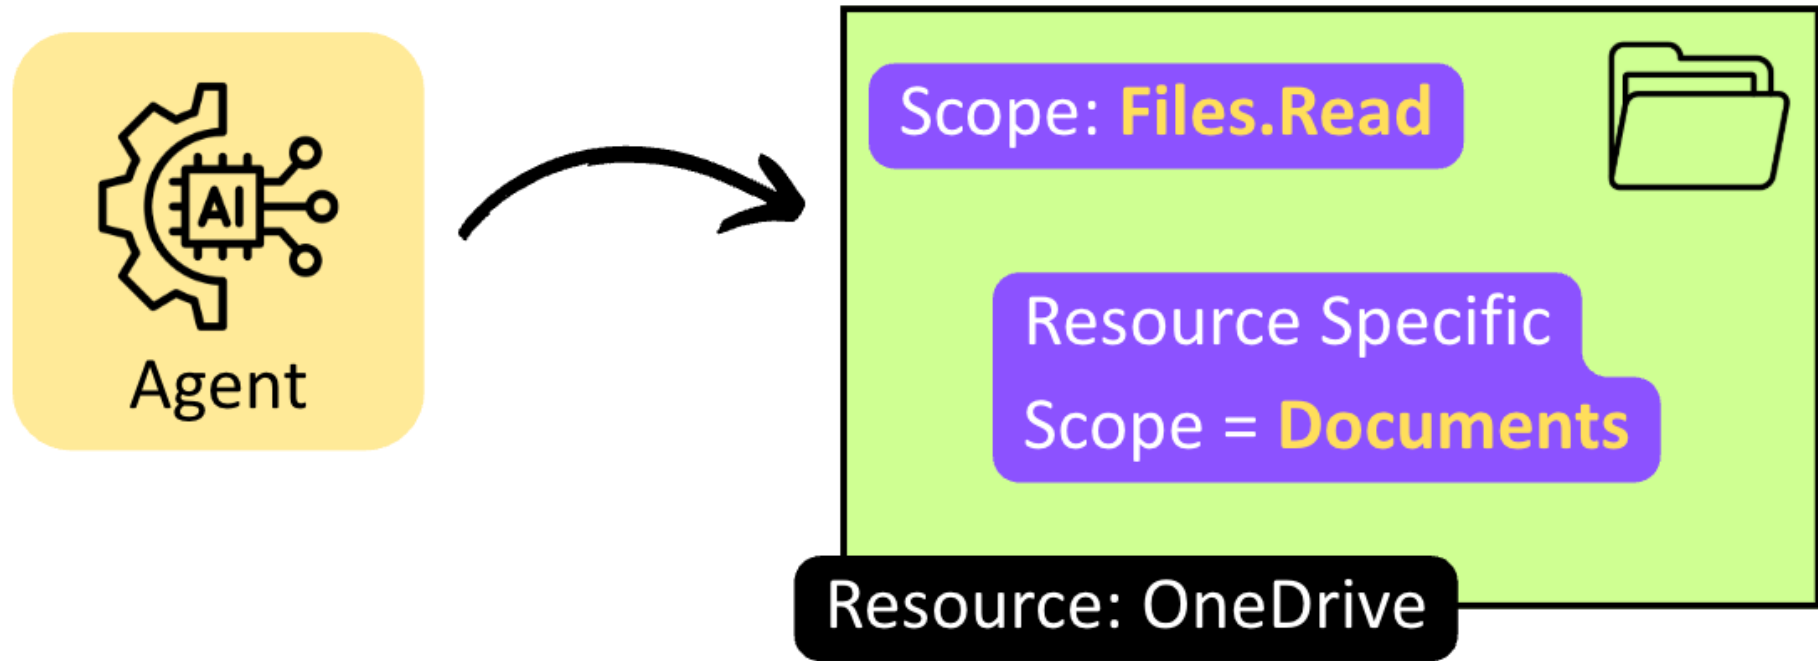

Transparent and Traceable Agent Actions

Permission discovery and delegation

Fine-grained, resource specific, least-privilege access
